e-LOOP MICRO

VERSION 4

ACCESSIBLE AUTOMATION

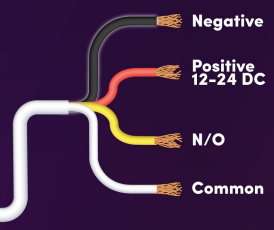

The e-LOOP Micro makes Gate Automation so simple, it's a no-brainer to install one. Competitively priced & infinitely easier than cutting in a traditional induction loop. Simply peel back the adhesive backing & stick the loop down, wire up the Transceiver and code the two together for ultra-easy automation

PRE-WIRED TRANSCEIVER

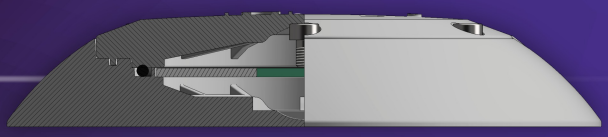

The e-TRANS 20 comes Pre-Wired for quick & easy installation. Simply wire into your gate's Open input, turn on Auto-Close & automated exit is easy.

A COMPACT WARRIOR

The e-LOOP Micro might be small but it's certainly mighty. Built to withstand everything domestic traffic can throw at it.

- Ultra-Rigid polymer casing
- High tensile strength webbing
- **2 Tonne** Static Load Capacity
- High Environmental Durability **(IP68 Rating)**
- Compact & Low profile **(110mm Dia. 27mm Height)**

• Easily Serviceable Batteries

Up to 2 Years of Battery Life. Minimizing maintenance & downtime for critical applications. Using **Off-the-Shelf Lithium CR123A Camera Batteries**, replacement is easy than ever.

• High Security Protection

New proprietary **Replay Attack protection**, securing the entire e-LOOP ecosystem from sophisticated wireless intrusion attempts. Ensuring site security.

• Heavy-Duty Construction

The e-LOOP Micro is engineered to handle any day-to-day abuse. The design has been subjected to extensive load & environmental testing. Able to withstand a 2 Tonne Static Load event.

• Install in Seconds

Version 4 Software includes an Increased radio range of 25 meters. (Line-of-sight)
